

ITE Western District Student Leadership Summit

Sponsorship Package

SLS
ite
UC Irvine

January 23rd – 25th, 2026

Welcome to SLS 2026!

We are excited to announce that the 13th Annual ITE Western District Student Leadership Summit will be held at UC Irvine in 2026. Please join us for three event-filled days of learning, networking, and camaraderie with fellow transportation enthusiasts – both students and professionals!

Organized entirely by students, the Summit offers a unique opportunity to develop leadership skills, explore challenges in transportation, and build lasting connections. The three-day program includes a transportation career fair, field trips, workshops, a banquet, and more. The SLS Operations Committee is committed to helping empower student leaders as they enter the industry and become our future engineers, planners, and decisionmakers.

ITE at UCI extends an invitation to you to join our efforts as a sponsor. Your contribution makes this Summit possible and empowers participating students to make positive changes in our transportation system and environment. We look forward to welcoming you to our beautiful campus in January!

Thank you,

Kailana Nishiura
25-26 President

Denny Quach
25-26 External VP

Benjamin White
25-26 SLS Chair

What is the SLS About?

Connections with Individuals Passionate About Transportation

SLS brings together students and professionals from all over the Western District, each with their unique experiences that have developed their enthusiasm for transportation. During the Summit, students and professionals will have the chance to connect, forming life-long collaborations and professional partnerships. Events at SLS such as the group projects, competitions, and banquet will foster community and allow everyone to meet passionate transportation enthusiasts.

Practical Learning & Field Trips

Beyond workshops and panels, SLS immerse attendees in the day-to-day of transportation practice. Students participate in field trips to operation facilities, project sites, and more to see how planning and engineering decisions impact the real world. These give students a tangible understanding of challenges like traffic management, transit scheduling, and infrastructure maintenance. Attendees are able to take these experiences at SLS and bring their newfound insights back into their own projects and coursework.

Opportunity to Meet Future Talent & Showcase Your Profession

All SLS attendees share a passion and deep commitment to advancing their careers in the transportation industry. They are all eager for ways to find new and innovative avenues for them to apply themselves. Industry professionals can network with aspiring engineers and planners at the career fair, and they can teach the future transportation community by leading various presentations, workshops, and more.
